

Amino-Tor™ provides the most effective performance-enhancing amino acids that athletes need for achieving optimal training results. Combining ideal amounts of glutamine as well as a 2:1:1 ratio of the branched chain amino acids leucine, isoleucine, and valine, Amino-Tor™ infuses muscles with the necessary nutrients for continued growth and recovery.

Unlike other amino acid formulas that are bitter and extremely unappetizing, Amino-Tor™ tastes nearly identical to pure, refreshing fruit juice...but without the sugar. Since all flavors contain only natural and healthy food colors, you never have to worry about the ill-effects of synthetic chemicals created in a lab. Each and every flavor of Amino-Tor™ is a culinary work of art that is designed to make you say, "WOW"!
